

Are you able to identify a clear statement of both functional and non-functional requirements?

- Yes. The document contains both functional and non-functional requirements clearly outlined. Functional requirements describe what the system should do, and non-functional requirements specify how it should perform.

Did the initial idea requirement change?

- No, there is no indication in the provided document that the initial idea requirements changed. The document presents the initial app idea along with its associated requirements without mentioning any changes.

Were any requirements left out when

designing the High/Med Fidelity Prototype?
If yes, to what extent were these requirements omitted compared to the initial idea?

- **Yes.** While the team didn't provide a hi-fi prototype, the lo-fi sketches serve as a valuable initial representation of the app's design and functionality. These sketches are typically used for early-stage conceptualization and can provide a solid foundation for further development and refinement of the app's design and features..

Do the supporting

- This question seems cut off.

Are there any aspects of the initial idea which have not been captured by the requirements?

- **No.** The provided requirements appear

to comprehensively cover the aspects of the initial app idea. The requirements address various features and functionalities necessary for the app's implementation.

Areas in which they have strayed from the initial idea?

- **No.** There is no indication in the document that the requirements have strayed from the initial idea. The requirements appear to align closely with the stated objectives of the app.

Requirements which have been unsuccessful in conveying their intent or have been vague?

- **No.** The requirements are generally well-structured and provide clear descriptions of what is expected.

Any opportunities that you feel may have been missed by the proposal?

- While the proposal for the Sirius App appears comprehensive, opportunities for further enhancement may arise through continuous user feedback, market research, scalability planning, exploration of emerging technologies, and a steadfast commitment to a user-centered design approach, all of which contribute to the unique success and growth of the Sirius App.
